When you have entered the information, click “OK.”

3. Click “OK.” Restart the need to restart your computer,

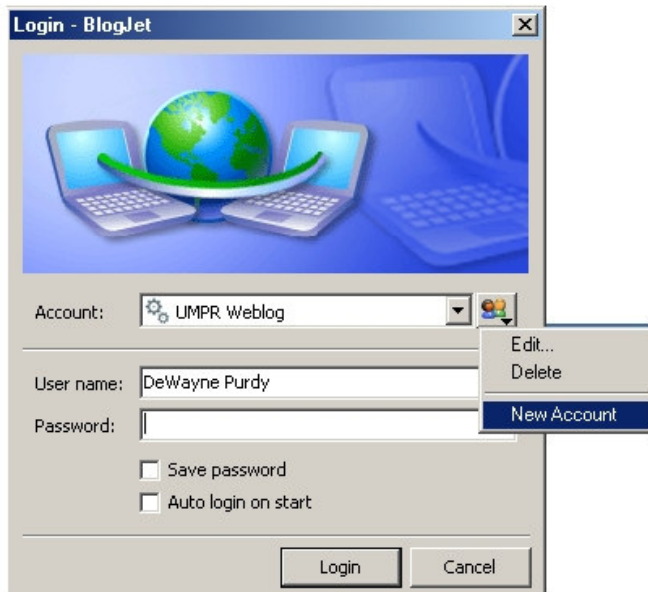

program. (You do not just the program)

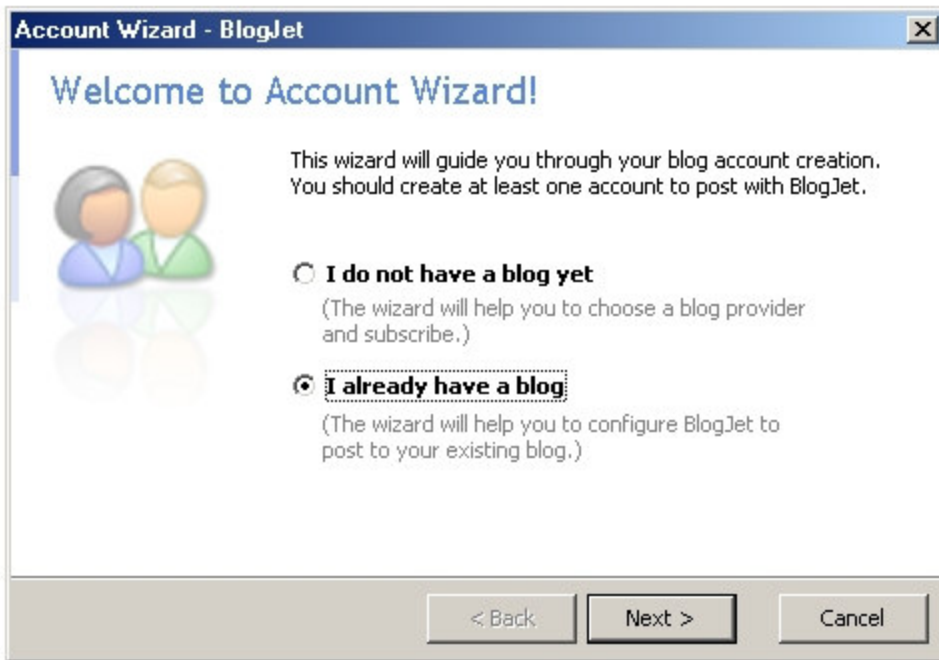

4. Click on the button beside Account.

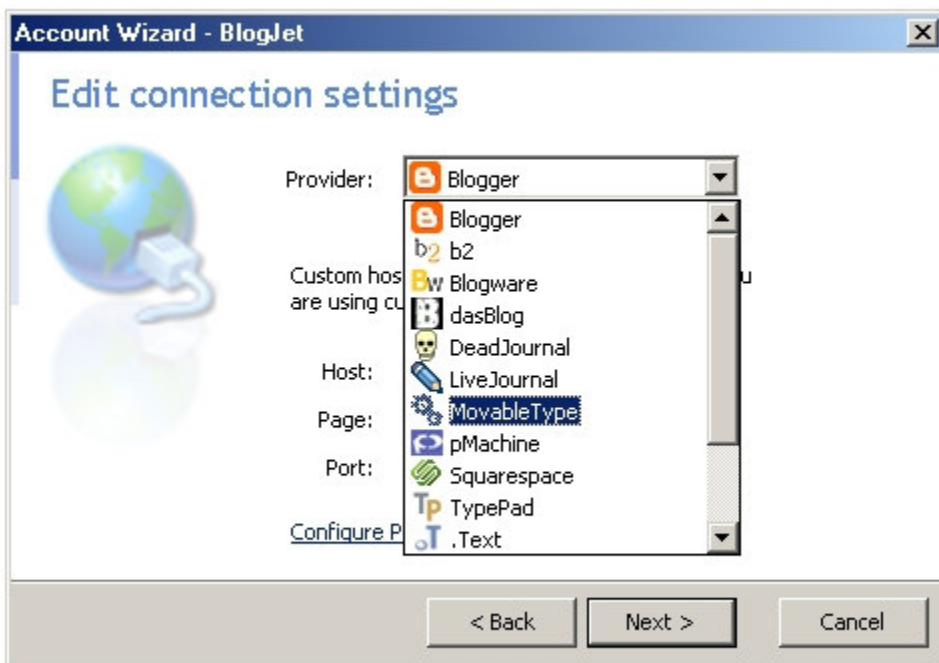

5. Select "New Account"

6. Select "I already have a blog," then click on "Next."

7. Click on the field next to “Provider” and scroll down to select “Moveable Type.”

8. Fill in the following information.

Host: weblogs.uni.edu
Page: /mt/mt-xmlrpc.cgi
Port: 443 **Use SLL**

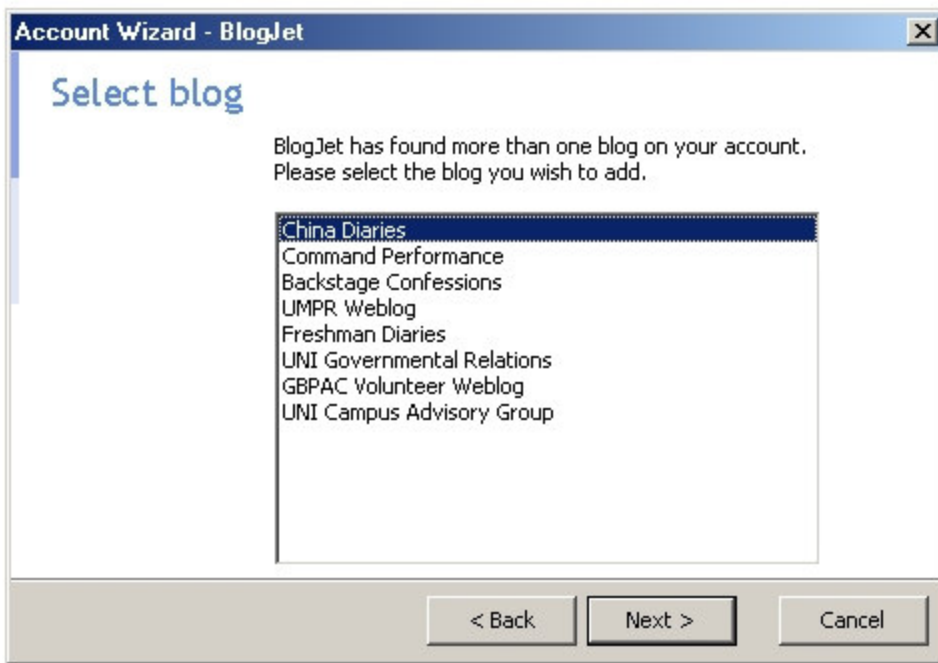

The screenshot shows a window titled "Account Wizard - BlogJet" with a close button in the top right corner. The main heading is "Edit connection settings". On the left, there is a globe icon with a plug. The "Provider" is set to "Movable Type" in a dropdown menu. Below this, a note says "Custom host settings (do not change unless you are using custom blog server):". The "Host" field contains "weblogs.uni.edu", the "Page" field contains "/mt/mt-xmlrpc.cgi", and the "Port" field contains "443". There is a checked checkbox for "Use SSL". A link "Configure Proxy..." is visible below the port field. At the bottom, there are three buttons: "< Back", "Next >", and "Cancel".

Click "Next."

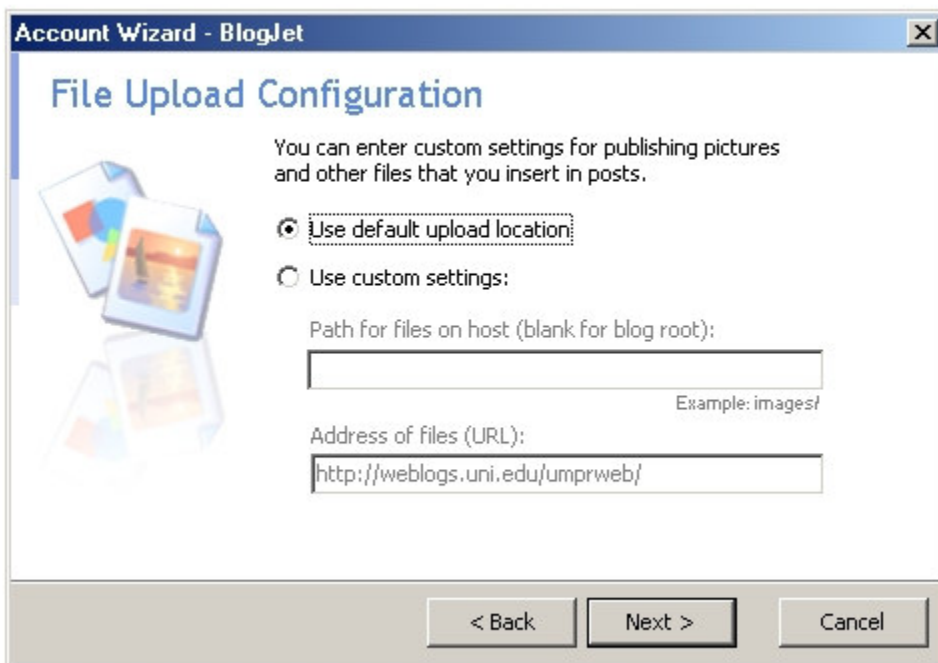

9. Enter your user name and password for your blog account and click "Next."

The screenshot shows a window titled "Account Wizard - BlogJet" with a close button in the top right corner. The main heading is "Enter username and password". Below the heading, it says "Please enter username and password of your blog account." On the left, there is an icon of two keys. The "Username:" field contains "User Name" and the "Password:" field contains "*****". There is an unchecked checkbox for "Save password". At the bottom, there are three buttons: "< Back", "Next >", and "Cancel".

10. Select your blog. If you have more than one blog, all the blogs you have access to will be listed. After selecting your blog, click "Next."

11. Make sure “Use default upload location” is selected. Click “Next”

12. Enter a title for your account. The address of your blog page should appear in the second field. Click “Finish.”
